"Facial & RFID Identification Terminal"

Introduction:

Smart Face Reader series of multi-biometric identification time attendance products adopts latest BIO600 platform with large capacity memory. The appearance of Smart Face Reader is designed by Germany professional design company according to the view of human engineering. All operations Smart Face Reader are designed to be finished on the 4.3 inches TFT touch screen. Multi-model communications includes RS232/485, TCP/IP, optional WIFI or GPRS. Optional built-in 2000 mAh battery eliminates the trouble of power-cut.

Features:

- Integration of Facial, RFID,and Password identification methods
- 4.3" TFT touch screen, easy operation, fashionable and simple interface
- 6 user-defined function keys
- Extendable scheduled doorbell
- Simple access control function
- Infrared optical system enables user identification in dark Environment
- Optional built-in backup battery support extra 4 hours continuous operation if power cut
- Optional built-in wireless WIFI or GPRS communication makes easier device installation without wiring

Specification

Processor:	Multi-Bio 600
Memory:	256M flash, 64SDRAM
Camera:	High Definition Infrared
Display:	4.3"TFT with touch screen
Storage Capacity:	Face:700
ID card:	10,000
Logs:	100,000
Back-up Battery:	2000 mAh
Communication:	TCP/IP, RS232/485

USB-HOST:	Two
A&C function:	Electric lock, door sensor, exit button, Wiegand output,
Optional functions:	WiFi, GPRS, serial printer, Mifare/HID/iClass,backup battery
Power Supply:	12V 3A
Verification Speed:	<=2sec
Operating Temperature:	0°C - 45°C
Operating Humidity:	20%-80%
Dimension:	193.6*165.2*86mm
