

CampusVue Student Reporting

CAMPUSSM
MANAGEMENT

“ CampusVue has allowed us to draw reports by single location, multiple locations, start new programs, provide services to students, and focus on what we do best — rather than ruler and pencil through reports. ”

Matt Johnston
President
Santa Barbara Business College

CampusVue Student

CampusVue[®] Student is the leading student information system for today's institutions of higher learning. Administrators and faculty leverage centralized data and automated workflows to improve recruiting, retention, academic delivery, and student services, while business officers gain a 360° view of campus operations for strategic analysis. The integrated product suite is designed to streamline and speed administrative tasks and offers modules for recruiting and admissions, academic records, financial aid automation, student accounts, housing management, career services, and reporting.

Make Informed Decisions with Real-Time Reporting

The Reporting module in CampusVue Student enables real-time access to key performance indicators. Faculty and staff can visualize data and share findings across administrative systems, from recruiting, enrollment, and academics to student finance. Administrators can access key metrics using any one of more than 400 reports, or they can create custom reports with the built-in report writer. With CampusVue Reporting, your institution can make decisions based on accurate, real-time information.

CampusVue Student Reporting

Gain Greater Insight into Operational Performance

You can achieve greater transparency and accountability across one or many campuses with the CampusVue Reporting module. The module includes a set of advanced tools that centralizes and streamlines the development and distribution of reports critical to accreditation and compliance. You can develop custom reports to sort, compare, and manipulate data in countless variations or automate the sharing of weekly reports with stakeholders campus-wide.

Enable On-Demand Reporting

CampusVue Reporting includes a set of advanced tools that make it easier to view and analyze information from across campus. Constituents can access current and consolidated data and visualize trends and relationships through rich graphical representations. Your institution can access and distribute reports on-demand, anytime, anywhere.

Extract In-Depth Data

You can extract data from the CampusVue Student database using a multidimensional, spreadsheet-style report or cube report. Unlike an ordinary two-dimensional spreadsheet, a cube report can accommodate three or more dimensions (and possibly hundreds) in a report presentation requiring visual impact. Now you can obtain data elements for various cube reports in a simple form, while drag-and-drop data headings allow for fast, customized analysis.

Increase Efficiency

Standard reporting features help institutions better manage staff and student information, and reconcile financial information.

Customize Reports Based on Unique Requirements

With CampusVue Reporting, you have the ability to customize reports through the extensive selection and sorting criteria of Crystal Reports. You can change the layout of a standard report by using a drag-and-drop interface for easy creation, then store the layout for future use.

Create Student Groups with Ease

You can create unique student groups from report selection criteria and save groups as static, dynamic, manual, or frozen for further reporting and monitoring of group activity.

Automate Reminders

The module enables you to create a multi-purpose reminder system (tickle reports) for coordinating important tasks and managing deadlines with students, faculty, and staff across departments and functions, including:

- Admissions
- Academic progress
- Student finance
- Program and curriculum metrics

The CampusVue Ecosystem Unites Academics and Administration

- Student information system for integrating departments and workflows
- Moodle-based e-Learning for online and blended academic delivery
- Self-service Web portals for students, faculty, administrators, advisors, and employers
- Finance, HR & payroll for fund and net asset accounting and employee self-service
- Performance analytics for a 360° view of multi-campus operations
- CRM solutions for strategic enrollment management, e-advising, and alumni relations
- Fundraising solutions for advancement and foundation programs

About Campus Management Corp.

More than 1700 colleges, universities, foundations, and nonprofit organizations worldwide rely on Campus Management Corp® for efficient, scalable, and flexible enterprise software products and services. The company's CampusVue Ecosystem is a fully integrated, centralized administrative and e-Learning platform that unifies services, academic delivery, administrative management, and reporting for a full range of public, private, and proprietary postsecondary institutions. The platform connects multiple sites and catalogs, enables flexible terms and multiple enrollments, and integrates economically to other leading applications, including software for Constituent Relationship Management (CRM), and learning management systems such as Blackboard® and Moodle®. Clients include Mercer University, Baker University, National University, Indiana University, and Kaplan University.
